Abstract

This package fixes caption problems with other-than-centered aligned longtables.
(solves `LATEX PR tools/3387`)

^{*}This package has version number v1.0, last revised 2007/04/15.

1 The user interface

Just include this package *after* the longtable package, e.g.:

```
\usepackage{longtable, ltcaption}
```

There are two possibilities for adaption:

You can alter the centering of the caption box (of width `\LTcapwidth`) by setting the lengths `\LTcapleft` & `\LTcapright` to appropriate values. These are set to `\fill` by default, just like the values `\LTleft` & `\LTright`.

Another option is the usage of the command `\LTcapmarginfalse` which makes the `ltcaption` package to use the values `\LTleft` & `\LTright` instead of `\LTcapleft` & `\LTcapright`.

Note: These adaptations do not work when used with one of the KOMA-Script classes `scrartcl`, `scrreprt` or `scrbook`, the KOMA-Script settings for captions are used instead. Same with the caption package.

2 Spot the difference

Without the `lcaption` package:

With the `lcaption` package (and the default value of `\LTcapwidth`):

With the `lrcaption` package and `\LTcapwidth=\linewidth`:
