Abstract

This package fixes caption problems with other-than-centered aligned longtables.
(solves [L^AT_EX PR tools/3387](#))

*This package has version number v1.1, last revised 2007/09/01.

1 The user interface

Just include this package *after* the longtable package[1], e.g.:

```
\usepackage{longtable,ltcaption}
```

`\LTcapleft` `\LTcapright` You can alter the centering of the caption box (of width `\LTcapwidth`) by setting the lengths `\LTcapleft` & `\LTcapright` to appropriate values. These are set to `\fill` by default, just like the values `\LTleft` & `\LTright`.

`\LTcapmarginfalse` Another option is the usage of the command `\LTcapmarginfalse` which makes the `ltcaption` package using the values `\LTleft` & `\LTright` instead of `\LTcapleft` & `\LTcapright`.

Note: If the `ltcaption` package will be used with one of the NTG document classes[2], `\CaptionLabelFont` & `\CaptionTextFont` will not only be used for figure & table captions, but for longtable captions as well.

Note: These adaption do not work when used with one of the KOMA-Script classes[3] `scrartcl`, `scrreprt` or `scrbook`, the KOMA-Script settings for captions are used instead. Same with the `caption` package which also uses its own options and settings.

`\LTcapttype` As a bonus feature this package patches the longtable package so `\LTcapttype` will be used internally instead of the fixed caption type 'table'. So for example this code snippet:

```
\renewcommand\LTcapttype{figure}
\begin{longtable}{ll}
\caption{An example longtable}\\
A & B \\
C & D \\
\end{longtable}
```

will result in a longtable like this:

Figure 7: An example longtable

A	B
C	D

`longtable*` Another bonus feature is the addition of the environment `longtable*` which does not increment the `table` counter. (As a consequence, `\caption` is not available for such longtables, but `\caption*` still is.)

2 Spot the difference

Without the `lcaption` package:

Table 1: Left aligned longtable left aligned longtable left aligned longtable
longtable

This is only a test

Table 2: Right aligned longtable right aligned longtable right aligned longtable
longtable

This is only a test

Table 3: Centered longtable centered longtable centered longtable centered longtable
centered longtable

This is only a test

With the `lcaption` package (and the default value of `\LTcapwidth`):

Table 4: Left aligned longtable left aligned longtable left aligned longtable
longtable

This is only a test

Table 5: Right aligned longtable right aligned longtable right aligned longtable

This is only a test

Table 6: Centered longtable centered longtable centered longtable centered longtable
centered longtable

This is only a test

With the `lrcaption` package and `\LTcapwidth=\linewidth`:

Table 7: Left aligned longtable left aligned longtable left aligned longtable left aligned longtable

This is only a test

Table 8: Right aligned longtable right aligned longtable right aligned longtable right aligned longtable

This is only a test

Table 9: Centered longtable centered longtable centered longtable centered longtable

This is only a test

With the `lrcaption` package and `\LTcapleft=0pt` resp. `\LTcapright=0pt`:

Table 10: Left aligned longtable left aligned longtable left aligned longtable

This is only a test

Table 11: Right aligned longtable right aligned longtable right aligned longtable

This is only a test

With the `ltablex` package and `\ltableleft=\tabcolsep`
resp. `\ltableright=\tabcolsep`:

Table 12: Left aligned longtable left aligned longtable left aligned

This is only a test

Table 13: Right aligned longtable right aligned longtable right aligned

This is only a test

With the `ltablex` package and `\ltablemarginsfalse`:
